

Business traction and deployment register

B1 · Slides 1, 3 and 8 · Company-reported business claims

The pitch reports the figures below. The supplied engagement summaries provide context for named relationships; they do not independently reconcile all customers, contract values or live deployments. Unsupported portions are marked **not yet verified**.

CLAIM IN PITCH	AVAILABLE MATERIAL	VERIFICATION STATUS / REMAINING EVIDENCE
15 enterprise customers; 18 active projects; 7 industries	Pitch 1 ; Pitch 8	Not yet verified. Dated customer/project register and counting rules required.
\$1.4M contracted, PoC + build, 2025–26; every project paid	Pitch 8	Not yet verified. Contract/PO reconciliation, currency/date basis and payment classification required. Contracted value is not collected revenue.
5 paid production deployments: GS Retail, Hyundai Glovis, CAU Hospital + 2	GS Retail · Hyundai Glovis · Hospital report	Not yet verified as a five-deployment total. Customer-use/acceptance and paid-status evidence for all five, including identification of the other two, required.
6 OCPs in operation; 9 in contract discussion	Pitch 8	Not yet verified. OCP/account register with dated operating status required. Discussion is not shipped adoption.
20%+ delivery cost reduction	Pitch 3	Not yet verified. Customer baseline, measurement window, before/after costs and customer confirmation required. The routing distance benchmark does not establish realized cost savings.
Airport operations, logistics routing and defense logistics: technical validation; robotic parking: live-site OI validation	Pitch 3	Not yet verified. Dated engagement/site confirmation required. These are validation claims, not additional paid production deployments.

Named relationship evidence

Open the individual evidence pages for dates, project identity and the precise scope of the supplied documents. A company-prepared summary is labeled as such and is not presented as an original customer email or invoice.
