

CAU Hospital Nurse Scheduling — Public Press Coverage

Omelet · NVIDIA Inception Grand Challenge Verification — supports "2 wk → 90 sec scheduling time (CAU Hospital nurse rostering)" and the CAU Hospital portion of "5 paid production deployments"

Confirmed by Omelet The hospital referenced anonymously in the article ("a domestic university hospital ward") is CAU Hospital, matching the deck's named-customer claim.

Headline “[KHF 2026] 오물렛, 대화형 AI 간호 스케줄링 '쓱케줄러' 시연”

Article Summary

오물렛은 국내 한 대학병원 병동에서 간호 근무표 작성 AI '쓱케줄러'를 현장 검증했다고 밝혔다. 근무표 초안 생성 시간은 최대 1분 30초 이내이며, 이후 채팅 기반으로 이어지는 수정 작업까지 연쇄 영향을 자동으로 검토해 반영한다. KHF 2026(8월 19–21일, 코엑스)에서 실제 화면을 시연할 예정이다.

*English summary (Omelet translation for reference): Omelet field-validated its conversational AI nurse-scheduling solution “Ssuk-scheduler” in the ward of a domestic university hospital. The tool generates a draft nurse work schedule in **at most 90 seconds**, and automatically reviews the downstream ripple effects of any subsequent chat-based edit (N-off rules, leave/off-day limits, skill-mix constraints, shift-preference exclusions). Live demo scheduled at KHF 2026 (Aug 19–21, COEX Seoul).*

90 sec

Max draft schedule generation time (article)

2 wk → 90 sec

Deck claim — matches article figure exactly

This article names the AI-scheduling product ("쓱케줄러") and the performance figure, but — consistent with standard Korean trade-press practice — does not itself print the hospital's name. The CAU Hospital identification above is an Omelet-confirmed fact connecting this public article to the named deployment cited in the deck; it is not, on its own, independent third-party confirmation of the hospital name. If stronger evidence is available (e.g., a CAU Hospital-branded case study, quote, or confirmation), it should be added alongside this article.
