

Hyundai Glovis Engagement Confirmation — Redacted

Omelet · NVIDIA Inception Grand Challenge Verification — supports "Hyundai Glovis · stowage · paid production" and "5 paid production deployments" claims

Redacted for external submission. Exact invoice amounts, both parties' business registration numbers, named individual contacts, personal email addresses, the tax-authority approval number, and the scannable verification QR code have been removed. Company names, transaction date, engagement type, and payment-stage status are retained, consistent with the verification requirement that redacted proof "should still show the company name where relevant, date, engagement type, and current status."

This evidence is a **government-registered electronic tax invoice** (Korea National Tax Service Hometax system), not an internal document — it is filed with the tax authority as part of Omelet's reported revenue. This is stronger evidence of a real, paid transaction than correspondence alone.

Supplier Omelet Inc. (주식회사 오믈렛)	Recipient Hyundai Glovis Co., Ltd. (현대글로비스 주식회사)
Engagement type Paid research contract — vessel stowage optimization	Line item “Vessel Stowage Optimization Research Contract” — advance payment installment
Invoice date May 18, 2026	Status Tax invoice formally issued via Hometax (Korea NTS) — advance payment (60% of contract) invoiced and billed

Invoice Summary (Redacted)

FIELD	VALUE
Document type	Electronic tax invoice (전자세금계산서), issued/transmitted via NTS Hometax
Approval number	[REDACTED]
Supplier business registration no.	[REDACTED]
Recipient business registration no.	[REDACTED]
Supplier / recipient contact emails	[REDACTED]
Line item	Vessel stowage optimization research contract — advance payment (60% of contract value)
Supply value (pre-tax)	[REDACTED]
VAT (10%)	[REDACTED]
Total invoiced	[REDACTED]

Amounts, registration numbers, named contacts and the verification QR code are redacted as commercial and personal information. The advance-payment structure (60% of contract value, invoiced at contract start) and the tax-invoice issuance itself are retained to demonstrate an active, paid, tax-reported engagement.

This document was prepared by redacting sensitive fields (exact invoice amounts, business registration numbers, named individual contacts, personal emails, tax-authority approval number, and verification QR code) from a government-registered electronic tax invoice issued by Omelet to Hyundai Glovis, while preserving the company names, transaction date, engagement type, and payment status required by the NVIDIA Inception Grand Challenge verification requirements.
