

One-page claim-to-evidence summary

Measured technical results · Implemented software demonstrations · Company-confirmed customer outcomes. References: final pitch slides 1–10 / appendix A1–A7.

One-page PDF	Technical report	Founder research	Watch product demos	Customer case studies	Pitch (anonymized)	Detailed claim register
SLIDE / SECTION	CLAIM MADE			CLAIM CATEGORY	EVIDENCE FILE / LINK	
A1–A2	Warehouse MILP: cuOpt 15.4 s; 1.39–2.86× CPU speedup			Technical	<u>T1 · MILP technical report</u> 316,814 variables; hardware, timing and feasibility	
A1–A2	Retail A routing: cuOpt 2,610 km / +0.83% gap at 60 s			Technical	<u>T2 · Customer-scale routing report</u> 537–586 orders; 7.28% lower distance vs OR-Tools	
A1–A2	Solomon: RouteOpt +0.08% gap; 38/56 wins			Technical	<u>T3 · Comparative solver report</u> 56 instances; 10 s nominal budget; exceptions stated	
3, 5–7*	Factory / Studio / Foundry and industrial application interfaces			Product	<u>P1 · Watch product demonstrations</u> 34 s workflow + 14 s applications; browser playback	
4, A4	Founder research: 6 selected co-authored papers; RL4CO 27 / 23			Research	<u>T4 · Founder research + papers / code</u> KAIST profile; KDD / NeurIPS / ICML / ICLR records	
4, A4	KAIST lab: 61 ML papers; 36 NeurIPS / ICML / ICLR; 897 stars			Research	<u>T4 · Official lab list + dated screenshot</u> Academic portfolio; stars are date-specific	
A1	Published large-scale CVRP: ~250× vs LKH-3 at 7K nodes			Research	<u>T4 · Paper Table 5.4</u> Published research comparison: 501 s / 2.0 s	
1, 3, 8	15 customers; 18 projects; 7 industries; \$1.4M; 5 deployments			Business	<u>B1 · Company-confirmed traction + cases · CS · Cases</u> Company-confirmed; anonymous case summaries linked	
3	Retail A: routing / paid production			Business	<u>B2 · Redacted summary + video</u> Company-confirmed; customer originals confidential	
3	Automotive Logistics B: stowage / paid production			Business	<u>B3 · Redacted summary + video</u> Company-confirmed; customer originals confidential	
1, 3, 8	Hospital C nurse scheduling: 2 weeks → 90 seconds			Impact	<u>B4 · Public article + company confirmation</u> 90 s draft generation public; customer records restricted	
1, 3, 8	20%+ delivery cost reduction			Impact	<u>B1 · Company-confirmed customer outcome · CS · Cases</u> Customer operational cost records confidential	
3, 8, A4	Validation projects; 6 OCPs operating / 9 discussions; 12 built			Business	<u>B1 · Customer and asset scope · B5 · CS · Cases</u> Company-confirmed; commercial stages distinguished	
4–7, 9	CUDA / cuOpt integration; OCP / OIP operating architecture			Technical	<u>T5 · Architecture + integration status</u> Integration in progress; measured experiments linked	
1, A4	Founded 2023; Seoul; 28-person team; founder credentials			Business	<u>B5 · Company and team</u> Company profile, team roster and public research	
5, 8–9, A3–A4	Isaac Sim / LP-MIP roadmap; \$3M→\$50M revenue; US hire			Plan	<u>B5 · Plans · T5</u> Forward-looking; distinct from achieved results	
A5–A7	Market sizing, competitor figures, positioning and moat			Context	<u>B6 · Appendix context and sources</u> Estimates / strategy; source-verification scope stated	

Disclosure: Company-confirmed means internally verified by Omelet; confidential customer records are not public. Videos demonstrate software interfaces, not an independent commercial audit. NVIDIA integration and roadmap stages remain explicit. *P1 videos: Final Codex deck, slides 3 / 7.
