

Market and competitive context

B6 · Appendix A5–A7 · Source attribution and verification boundaries

These appendix figures provide market context rather than product-performance evidence. They are deck estimates/snapshots, with source attribution and calculation boundaries shown below. The numerical third-party figures are **not yet verified** against exact dated source records in this submission; customer confidentiality is not used as a substitute for those sources.

CLAIM GROUP	FIGURES IN THE PITCH	VERIFICATION BOUNDARY
US optimization labor	112K OR professionals; 9.6K annual openings; +21% growth, 2024–34; \$292–506K loaded annual pod cost; ~\$54B labor-equivalent pool	Deck attributes BLS 2024; loaded-cost formula wage / 69.9%. Exact occupational tables, inputs and pool calculation not attached. Labor-equivalent spend is not software TAM.
US large-firm screening universe	20,900 sector firm-count sum: 4,177 manufacturing; 3,303 wholesale; 2,364 transport; 4,359 healthcare; 4,202 administrative; 2,289 retail; 206 utilities	Deck attributes Census SUSB 2022, 500+ employees. Sector sum is not deduplicated; not a qualified customer count. 9,844 Wave1 + 11,056 adjacent = 20,900.
Revenue ambition / market comparison	\$50M in 2030 ≈0.1% of \$54B	Management comparison of a software revenue target to a labor pool; not a verified market-share forecast.
Competitor valuations and revenue	Palantir \$298B / \$4.5B; Kinaxis C\$4.2B / \$548M; o9 \$3.7B / ~\$157M; ORTEC ~\$210M; Timefold \$13M Series A; Nextmv ~\$14M raised	Pitch snapshot/estimates, with mixed dates, currencies and financial concepts. Dated source records not attached; do not treat as current independently verified values.
cuOpt open-source, 2025 / Apache-2.0	<u>NVIDIA cuOpt repository</u>	Repository is a primary reference. The specific historical timing is not audited here.
Competitive positions and moat	<u>Competition</u> · <u>Moat</u>	Company positioning and qualitative thesis, not independently scored comparisons.
